Rob Watts, Scientist: 207.633.9412 or rob.watts@maine.gov

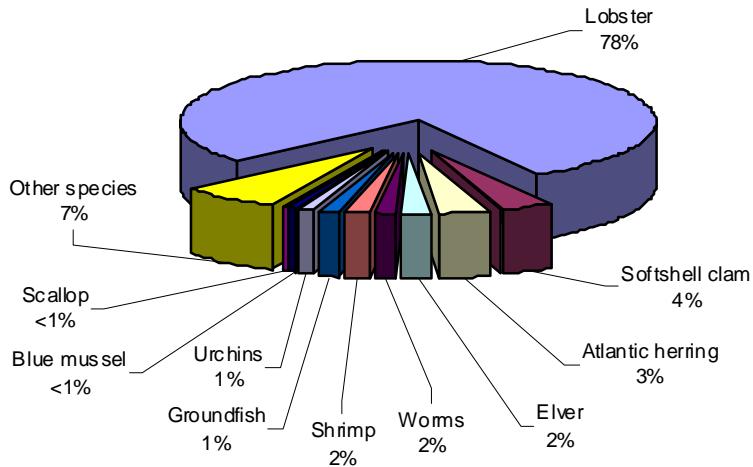

Why collect landings?

DMR and National Marine Fisheries Service are responsible for collecting landings and catch statistics for commercially harvested marine species in Maine. Seafood dealers and retailers who buy from harvesters provide the landings, while harvesters provide catch data. The main objective is to obtain accurate and complete information on all commercial species for the sake of coastal fisheries and the communities they support. These data help demonstrate the socio-economic importance of the seafood industry to Maine's economy and is used in fisheries management. DMR appreciates industry participation in providing this valuable information on Maine's fisheries.

For more species specific landings, visit our website: <http://www.maine.gov/dmr/comfish.htm>

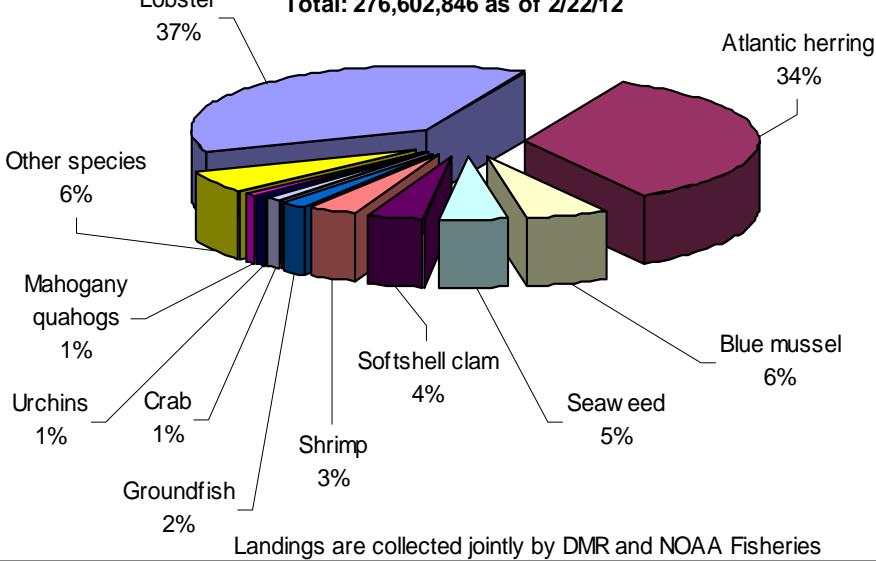

Preliminary 2011 Commercial Maine Landings By Ex-Vessel Value

Total: \$425,774,826 as of 2/22/12

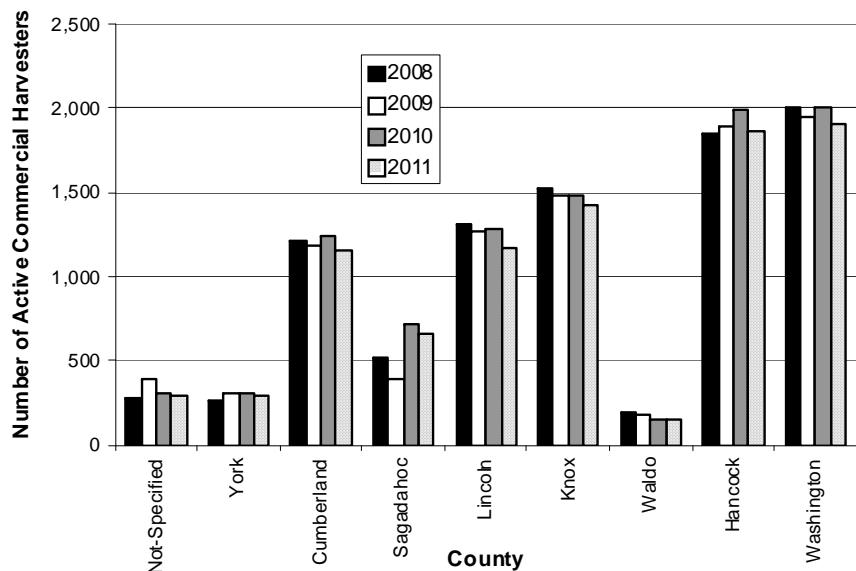

Preliminary 2011 Commercial Maine Landings By Live Pounds

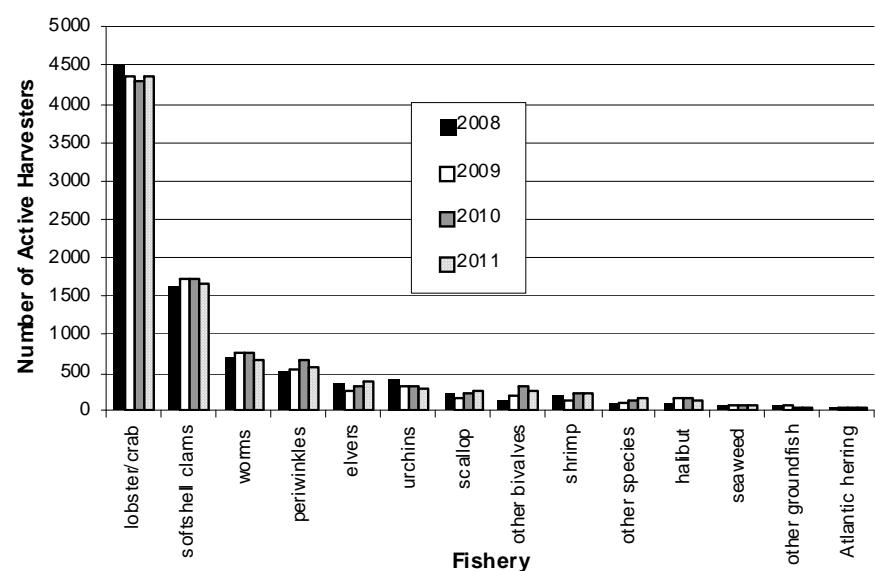

Total: 276,602,846 as of 2/22/12

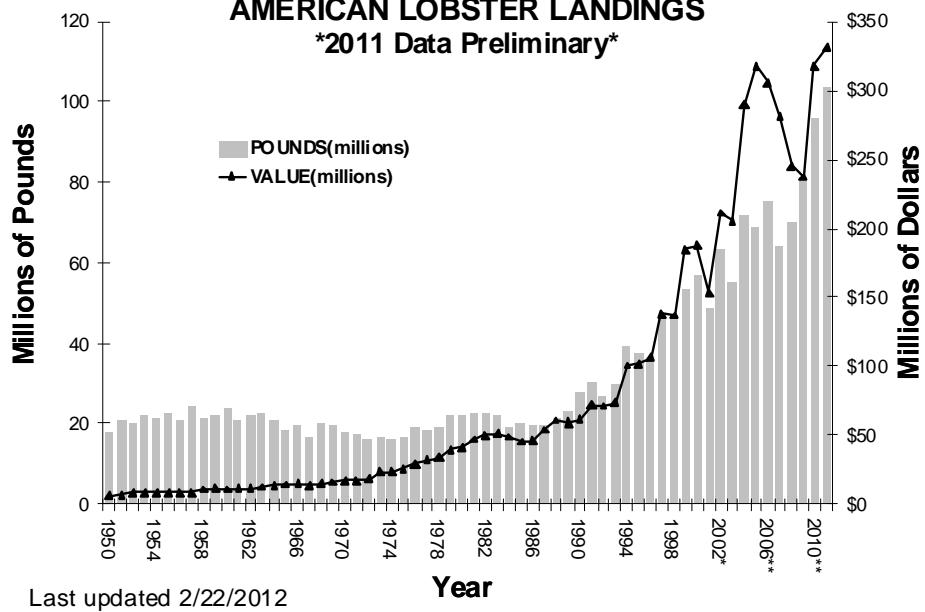

Number of Active Maine Commercial Harvesters By County 2011 Data Preliminary

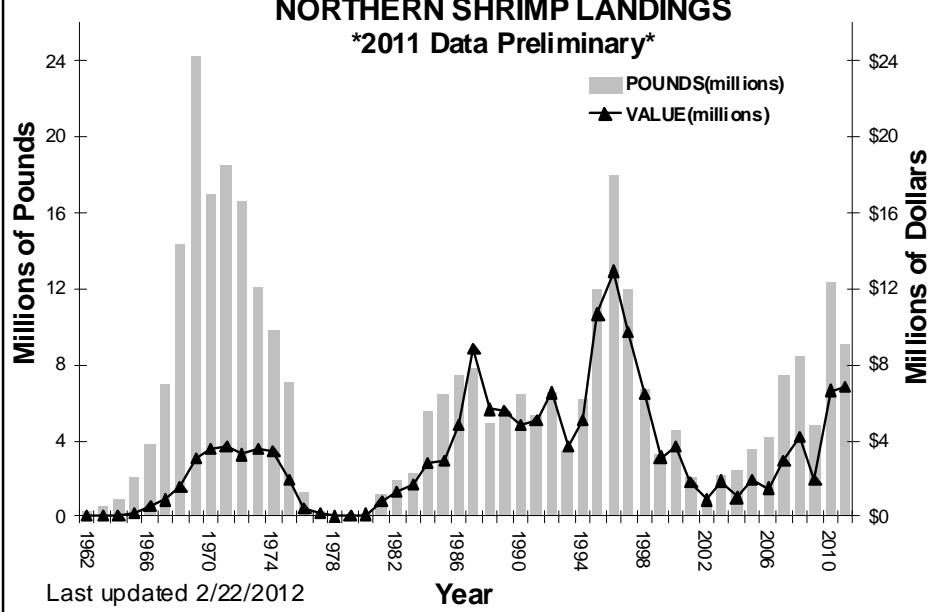

Number of Active Maine Commercial Harvesters By Fishery 2011 Data Preliminary
